## TELL YOUR EMAIL ACCOUNTS APART

You now have 2 email accounts that log in through Google.com when you are not on campus.

We are suggesting that you put your school picture on your blackhawkchristian.org and an avatar (clipart) for your bcsstudent.org.

Here is why – someone who has autocomplete on who starts typing your email address will know at a glance which one to choose. When you log in remotely from a shared computer you will be able to see at a glance that you need to log someone out and log yourself in.
